## Now one of your most powerful finishing tools is the one in your pocket

The Chemcraft mobile web app gives you ready access to detailed product information, an extensive troubleshooting guide, how-to videos and our new coverage cost calculator.

This robust and easy to use tool is the only one of its kind in the industry and it's absolutely free.

On your tablet or smart phone, visit one of these 2 locations and select "Add to home screen" from your browsers menu (Chrome browser recommended for Android users):

**Canadian market:** [chemcraft.com/mpca](http://chemcraft.com/mpca)

**U.S. market:** [chemcraft.com/mpi](http://chemcraft.com/mpi)

### Features:

Browsing or searching for product information is now even easier. Fast access to useful data including:

- Product specifications
- Environmental data
- Application data
- And much more

**New:** Our coverage cost calculator allows you to easily get valuable information to aid in new project proposals:

- Wet coverage: Square feet per litre
- Dry mils
- Cost: Cents per square meter

Our comprehensive troubleshooting guide puts solutions to common finishing problems right at your fingertips.

Easy access to our popular how-to video series gives you powerful tips and techniques right on the shop floor.

# Company Alphabetical Listings

## A & W Products, Inc.

1041 Astondale Rd., Bishop, GA 30621  
P 706-769-9012

info@aw-products.com  
www.aw-emulsions.com

Contact: Walker Whitmir

A & W Products manufactures a complete line of wax emulsion formulations for paints and coatings, treated wood products, engineered wood, and coated paper. Additives are paraffin carnauba, slack wax, soy wax, and silicone blends. Products custom formulated for specific needs

## A Brite Company

3217 Wood Drive, Garland, TX 75041  
P 214-291-0400 F 214-291-0300

info@abrite.com  
www.abrite.com

Contact: Harry Hassell

A Brite Company is a chemical blender of industrial cleaners and environmental products as well as a toll blending stocking distributor for MacDermid Enthone Industrial Solutions. We are a regional distributor for Palm metals and Houghton International metal-working fluids. A Brite also manufactures and maintains a large stock of many types of industrial, surface finishing and environmental equipment and parts.

## A.S. Paterson Company Limited

1110 Sheppard Ave. East - 404,  
Toronto, ON M2K 2W2  
P 416-222-3333 F 416-222-5034

rpateron@aspateron.com  
www.aspaterson.com

Contact: Rod Paterson

A.S. Paterson Company is a 90 year old Canadian distributor of pigments, dyes, waxes, resins and additives for the paint, coatings, ink, plastics and specialty chemical industries. Technical sales representatives located across Canada help companies solve problems.

See Our Ad on Page 67

## ABB Inc.

201 Westcreek Blvd, Brampton, ON L6T 5S6  
P 905-460-3000 F 905-460-3019

www.abb.ca

ABB is a supplier of industrial robots – also providing robot software, peripheral equipment, modular manufacturing cells and service for tasks such as welding, assembly, painting, picking, packing, palletizing and machine tending. Key markets include automotive, plastics, metal fabrication, foundry, pharmaceutical and food and beverage industries.

## ACE Equipment Co.

4725 Manufacturing Rd, Cleveland, OH 44149  
P 216-267-6366 F 216-267-6366

sheran@armaturecoil.com  
www.armaturecoil.com

Contact: Scott Heran

Family owned since 1919, ACE Equipment manufactures burn off and curing ovens. Their design provides high efficiency, uniform temperatures and long life.

## Aceto Corp.

4 Tri Harbor Ct., Port Washington, NY 11050  
P 516-627-6000 F 516-627-6093

aceto@aceto.com  
www.aceto.com

Aceto offers a range of chemicals for specific use in epoxy, urethane, UV-cured, powder, and polyurea coatings. These include performance additives and a complete line of organic pigments, TiO2 and free-radical and cationic photoinitiators.

## ACT Test Panels LLC

273 Industrial Dr, Hillsdale, MI 49242  
P 517-439-1485 F 517-439-1652

sales@acttestpanels.com  
www.acttestpanels.com

Contact: Brad Kimpell

Wide range of test panel products and services including ACT Certified Test Panels for coatings R&D; utility grade TRU panels for spray outs and hiding evaluations. ACT also operates an ISO 17025 accredited test laboratory specializing in the evaluation of coating performance.

## Advanced Chemical Co.

105 Bellows St, Warwick, RI 02888  
P 800-553-3568

info@advchem.com  
www.advchem.com

Full service precious metals refiner of gold, silver, platinum, palladium and rhodium; manufacturer of proprietary precious and non-precious metal electroplating processes and other specialty chemistries. ACC holds the following certifications: ISO 9001:2008, ISO 14001:2004, OHSAS 18001, R2, IATF.

## Adwest Technologies, Inc./CECO Env.

4222 East La Palma Ave., Anaheim, CA 92807  
P 714-632-9801 F 714-632-9812

bcannon@OneCECO.com  
www.adwestusa.com

Contact: Brian Cannon

Adwest is a CECO Environmental Company supplying RETOX regenerative thermal oxidizers and VOC concentrators for VOC control on finishing spray booth, surface coating and curing oven applications. RETOX RTOs provide flameless NOx-free operation with up to 97 per cent primary heat recovery for low energy consumption.

## AGC Chemicals Americas

55 E. Uwchlan Ave., Exton, PA 19341  
P 805-428-6743 F 805-583-5917

winn.darden@us.agc.com  
www.lumiflonusa.co

Contact: Winn Darden

Supplier of LUMIFLON fluoropolymer resins used to make ultra-weatherable coatings for architectural, industrial maintenance, aerospace, alternative energy, and automotive applications. Products include solvent based resins, solid resins for low VOC coatings, water based resins and powder coating resins.

## Akzo Nobel Wood Coatings Ltd.

155 Rose Glen Rd, Port Hope, ON L1A 3V6  
P 905-885-6388 F 905-885-7587

chemcraft.ca@akzonobel.com  
www.chemcraft.com

Contact: Jeff Snyder

Innovative and sustainable solutions for wood coatings and adhesives. Leaders in coatings for cabinetry, wood & vinyl flooring, window & doors, building products, residential, office & contract furniture and distribution through Chemcraft® brand. Adhesives for building products, flooring & furniture

See Our Ad on Page 2

## AkzoNobel Powder Coatings

150 Columbia Street, Reading, PA 19601  
P 800-367-3318 F 610-603-7584

www.interpon.com

AkzoNobel Powder Coatings supplies powder coatings, offering effective coatings solutions for a wide range of applications including: furniture, automotive, IT, appliance, the architectural market and general industry.

## Alberdingk Boley Inc.

6008 West Gate City Boulevard,  
Greensboro, NC 27407  
P 336-454-5000 F 336-454-5007

info@alberdingkusa.com  
www.AlberdingkUSA.com

Contact: Bob Conlon

Global supplier of innovative water-based acrylic emulsions, NMP-free & solvent-free polyurethane dispersions, UV-curable dispersions, castor oil and linseed oil polyols and acrylic polyurethane copolymers. Supplier also of environmentally friendly water-based emulsions and dispersions to the paint and coatings, adhesives, and graphic arts industries.

## Aldonex, Inc.

2917 St. Charles Rd., Bellwood, IL 60104  
P 708-547-5663 F 708-547-5738

sales@aldonex.com  
www.aldonex.com

Contact: Alan Miller

Manufacturer of DC power supplies. SCR rectifiers manual or motorized variable transformers, tap-switch rectifiers, periodic reversing units, water-cooled rectifiers. SCR pulse rectifiers, modular power supplies, and Switchmode power supplies. Also, new and used DC power supplies and other equipment, parts and service.

## Allcolour Paint Limited

1257 Speers Road, Oakville, ON L6L 2X5  
P 905-827-4173 F 905-827-6487

rchapman@alcolour.com  
www.alcolour.com

Contact: Robert Chapman

Allcolour produces a wide range of high-quality, high-performance coatings for OEM, general industrial, and DBO-duty applications. In business for over 40 years, Allcolour offers the latest technology, environmentally responsible products manufactured in a completely renovated state-of-the-art facility.

## All-Flo Pump Co.

7750 Tyler Blvd., Mentor, OH 44060  
P 440-269-8155

sales@all-fl.com  
www.all-fl.com

Contact: Paul McGarry

All-Flo manufactures rugged, lube-free, non-stall/freeze air diaphragm pumps. Serving a variety of industries, including oil & petroleum, petrochemical, food & beverage, mining and construction, All-Flo has a global network of distributors to ensure local availability and service. All-Flo offers a versatile range of durable and reliable pump solutions that can be customized for any application. All company products are made in America.

## Alliance Industrial Masking, Inc.

200 South Ludlow Street, Dayton, OH 45402  
P 937-681-5569

chris@custommasking.net  
www.custommasking.net

Contact: Chris Gray

Provider of custom tape masks and offering next-day delivery. With company manufacturing process, no die is required. This eliminates the time and cost associated with a manufactured die.

## Allied Cans Limited

8400 Lawson Road, Unit # 5,  
Milton, ON L9T 0J8  
P (905) 864-7200 F (905) 864-3384

awan@alliedcans.com  
www.alliedcans.com

Contact: AFZAL M. AWAN

Manufacturer of UN & non-UN steel pails (open head & closed head), paint cans (unlined, grey lined & gold lined) and F-style oblong cans,

## Allied PhotoChemical Inc.

16024 Angelo Drive,  
Macomb Township, MI 48042  
P 586-232-3637 F 586-232-3889  
dsweetwood@alliedphotochemical.com  
www.alliedphotochemical.com

Contact: Dan Sweetwood

UV technology company. Clear and color coatings, UV dielectrics, stereolithographic resins, UV specialty formulations, prepared for specific needs

## All-Weld Company Limited

P 416-299-3311  
allweld.ca@gmail.com  
www.allweld.ca

Contact: Robin Davis

All-Weld Company Ltd. provides custom solutions in machining, engineering, and metal fabrication. Offering industrial pressure vessels, heat exchangers, and process equipment, which meet global standards.

## Aluminum Anodizers Council

1000 N. Rand Road, Wauconda, IL 60084  
P 847-526-2010 F 847-526-3993

mail@anodizing.org  
www.anodizing.org

Contact: Suzanne Spohr

The Aluminum Anodizers Council (AAC) is the international trade association engaged in aluminum anodizing. The Council's mission is to support members through education, advocacy, and promotion.

See Our Ad on Page 81

## Aluminum Surface Technologies

1055 Pachino Crt, Burlington, ON L7L 6B9  
P 9053326688 F 9053325492

sales@surfacetech.ca  
www.surfacetech.ca

ISO registered rapid turnaround solutions provider specializing in engineered coatings, aluminum finishing, casing impregnation and non-ferrous heat treating. Solutions available for most metals addressing corrosion, surface hardness, mold release, friction, wear and sticking/galling even for pharmaceutical/food/medical equipment (CFIA/FDA approval available).

## AlumiPlate, Inc.

8960 Springbrook Dr., Minneapolis, MN 55433  
P 763-786-3788 F 763-786-8518

info@alumiplate.com  
alumiplate.com

Electrodeposited aluminum systems. Developer and provider of unique electroplating processes, equipment and know-how for applying high purity aluminum to solve existing corrosion, appearance or performance problems.

## Amariko Inc.

PO Box 282, Clarendon Hills, IL 60514  
P 800-262-7456

info@amariko.com  
www.amariko.com

Contact: Thomas Marik

Amariko provides business management computer software for finishing job shops including office and shop-floor systems custom programming, onsite services and prompt support.

## American Colors, Inc.

P.O. Box 397, Sandusky, OH 44870  
P 419-621-4000 F 419-625-3979

buss@americancolors.com  
www.americancolors.com

American Colors has made coatings and pigment dispersions since 1975. Systems include: plasticizer, aqueous, epoxy, polyester and others. Custom color house capable of producing a coating or colorant to nearly any specific tint.

## American Plating Power, LLC

2176 Andrea Lane, Fort Myers, FL 33912  
P 239-275-5877 F 239-275-4959

info@americanplatingpower.com  
www.americanplatingpower.com

Contact: Waasy Boddison

American Plating Power offers a full range of DC and Reverse Pulse power supplies, along with process controllers and Windows-based control software. Additionally, our full service department offers repair, preventive maintenance, rectifier calibrations and parts for all brands of rectifiers

www.ragogna.com

Specialize in the custom design of high-speed dispersers and filling machine. Machines are rugged, have a long life and are guaranteed for years of trouble-free operation.

### Ranbar

408 Manor-Harrison City Rd.,  
Manor, PA 15665

P 724) 864-8200 F 724-864-8232

rmccourt@ranbar.com

www.RANBAR.com

Ranbar is a manufacturer of custom and commodity alkyds, polyesters, water reducible and epoxy ester resins for architectural and industrial coatings.

### RB Atlas

9 Canso Road, Toronto, ON M9W 4L9  
P 800-479-8167 F (416) 241-9008

sandra@rbatlas.com

www.rbatlas.com

RB Atlas is a one-stop resource for physical testing and inspection instruments for coatings, polymers, textiles, automotive and allied industries.

**Reactive Surfaces, Ltd.**

300 West Ave, Austin, TX 78701  
P 512-472-8282

[www.ReactiveSurfaces.com](http://www.ReactiveSurfaces.com)

Reactive Surfaces produces and markets bioengineered enzymes and peptides, such as biocides, degreasing agents and others. Also, green technology to make coatings functional and bring them to life.

**Reaxis Inc.**

941 Robinson Hwy., Pittsburgh, PA 15057  
P 800-426-7273

[michael.curcione@reaxis.com](mailto:michael.curcione@reaxis.com)  
[reaxis.com](http://reaxis.com)

**Contact: Michael Curcione**

Reaxis is a manufacturer of a wide range of metal-based products for coatings applications. Product families include: 1) catalysts of polyurethane and silicone coatings and 2) metal salts for plating applications.

**Red Spot Canada Ltd.**

1215 Meyerside Dr.,  
Mississauga, ON L5T 1H3  
P 905-564-7768

[www.redspot.com](http://www.redspot.com)

Red Spot manufactures coatings for plastics for interior and exterior applications. Technologies include Exterior 2K/2K, UV curable coatings, interior waterborne and solventborne, and in-mold coatings.

**Reichhold**

1035 Swabia Court, Durham, NC 27703  
P 919-990-7500 F 919-990-7749

[www.reichhold.com](http://www.reichhold.com)

Resins and curing agents used by coatings formulators, including powder coating resins, alkyds, acrylics, urethanes, epoxy resins and curing agents, and radiation-cured solutions. Reichhold resins are used to produce paints, stains, varnishes, inks and other coatings.

**Reimbold Global LLC**

plating and anodizing: **WASTE WATER CONTROL**

**Cleaning Wastewater**

**CLEANING UP THE WATER** from plating and related kinds of operations is simple in concept, but more complicated in practice. Removal needs and chemicals used in the manufacturing process is subject to federal and provincial or local laws, and while the general principles are always the same, specific regional regulations can affect the types of equipment a plant requires.

There is also an outside perception aspect to this subject. In the case of an unskilled look, perhaps arising from incompletely treated effluent causing a bad smell during the nightfall, a company needs to be able to show that its system can comply with all the regulatory needs, and that cost savings does not indicate a corporate culture of carelessness.

OK, to select an old equipment, what happens in the plant says in the place where leaving the plant is a different story.

There are a number filtration methods available as there are kinds of industrial waste to remove. For example, effluent by Waco and Waco-Water Equipment Co. This, the company states, can remove metals down to the parts per billion level. Metals is dealt with outside copper, nickel, aluminum and lead.

It also offers a number of flow microfiltration membrane systems that remove selected inorganic, organic, or heavy metal constituents. A two-step process begins with

chemical pre-treatment that captures the contaminants in filterable particulates and removes existing effluent. Next, membrane microfiltration accomplishes physical separation of the particles.

A further method, ion exchange, sends waste through ion-exchange columns. Ion-exchange resin in the waste are exchanged for other ions found in the bath.

Finally, reverse osmosis is one of the company's most popular systems, and is considered the most economical method of removing 90 to 99 percent of all contaminants. The pore structure of RO membranes is one-tenth that of UF membranes, and they are capable of rejecting practically all particles, bacteria and organic down to 100 Dalton molecular weight. This includes proteins.

In such water purification systems, hydraulic pressure is applied to the concentrated solution to overcome the osmotic pressure. Pure water is driven from the concentrated solution and collected downstream of the membrane.

A fiber Co. also offers reverse osmosis systems. These the company says, use spiral membrane such techniques for efficient low cost operation, offering a wide range of flow rates.

A. Hays Co. also produces its Electro-kinetic compounds, which deal with heavy metals in aqueous solutions. For example, an Ironoxide (Fe-OC) is a proprietary compound

and produce de-aerated water for recycling. The company says it can save much further cost close to achieving a Zero Liquid Discharge (ZLD) facility.

In addition, large, rapidly loading filter, the company says, get rid of sludge volume. It is recommended for breaking light, clarified waste streams, substantially reducing sludge and reducing turbidity in the water.

Another component in the Electro-kinetic range, Deposition, is a highly concentrated liquid designed to precipitate heavy metals from aqueous medium. Solutions treated with Deposition provide heavy metal precipitates that rapidly have excellent stability, and positive load-shed, plus their respective sodium and magnesium hydroxide precipitates. They also, A. Hays says, effective over a wide pH range.

The direct filtration of wastewater or grey water for water recovery, is done by Auto Filter, a compact, dual tank integrated system. Processing up to 4,500 GPD, this system can receive continuous flow water up to 95 percent of original volume without the use of chemicals.

Typical applications include waste recovery from spent coolant and oil contaminated wastewater, strip water, compressor blow-down, and refrigeration condensate recovery. The high capacity UF systems employ parallel channels, high flow spiral membrane technology to separate water from suspended solids and emulsified oils. With process rates available up to 6000 gpd, these membrane systems are designed for continuous applications in both environments.

A filter also offers a DUF system, which utilizes the process a ultra-filtration air flotation, with added microfiltration technology for the final polishing of effluent. These hybrid systems are designed to treat waste streams normally considered too difficult for membrane systems due to high oil and grease, and solids loading.

This design allows for a much smaller footprint than conventional clarification/separation systems and requires membrane post treatment. A two-filtration and reverse-osmosis elements can also be utilized.

Kemtec's reverse osmosis systems also use spiral membrane technology. With this, the company offers a range of flow rates, from 100 to 1,000 gpm.

They feature a PLC/SCADA controlled user interface, and a choice of digital or analog flow and quality sensors. There is a Sigma 3 rated control panel, and ASME rated and stamped pressure vessel.

Both the stainless steel or 316 or 316L stainless steel offer quiet and reliable operation, the company says. These incoming options are offered with either spot-coated mild steel or stainless steel frames. There is also stainless steel recirculation, and up to 95 percent water recovery, and a 10-micron prefilter assembly is included.

Kemtec also offers an ultra-low exchange systems to remove dissolved heavy metals and salts from wastewater

# A Brand You Can Trust

## AVAILABLE NOW IN CANADA

For over 50 Years Gemini has been a brand you can trust for wood finishing with excellence, **INSIDE AND OUT!**

*The Gemini Product Family Includes:*

- Stains and Glazes
- High Build/Solids Lacquers
- Water Clear Lacquers
- Clear and White Precatalyzed Lacquers
- Clear and White Conversion Varnish
- Pigmented Sealers & Topcoats
- Clear and White Waterbornes
- TWP® Exterior Wood Protectants
- Touch Up Supplies

# DYNAMIX Inc.

## Dynamix Fume Suppressants

for Hexavalent Chromium Plating Solutions

Specifically developed to reduce the surface tension to less than 30 dyne/cm  
 in decorative and functional hexavalent chrome plating applications.

**Dynaplate CR FSL**

- Perfluorooctane sulfonate (PFOS) free.
- Perfluorooctanoic acid (PFOA) free.
- Very minimal foaming.

**Dynaplate CR FS**

- Perfluorooctane sulfonate (PFOS) free.
- Perfluorooctanoic acid (PFOA) free.
- Low foaming.

**Dynaplate Cr FSN**

- Perfluorooctane sulfonate (PFOS) free.
- Perfluorooctanoic acid (PFOA) free.
- Perfluorinated compound (PFC) free.
- Halogenated compound free.
- Completely fluoride free.

# Northern Technical Solutions "No Problems Just Solutions"

We provide high quality proprietary chemistry to the aluminum finishing industry under the NORSOL Brand.

Cleaners – Alkaline and acid • Etches – Caustic etch additives and blends and Acid etch • Deox • Anodizing additives • Electrolytic colouring • Sealants • Conversion Coatings. • NTS – Northern Technical Solutions represents Clariant dyes and seal products.

#### NTS – Northern Technical Solutions is a full service supplier:

- Full service laboratory to analyze chemicals and finished products.
- Pilot line for development and testing.
- In-line product and process evaluation.
- On-site training seminars are available.
- Personal instruction is available at NTS laboratory.
- Strategically located wear housing for on time delivery across Canada.
- Products are sold in 20 Liter carboys 200 litre drums and 1000 liter totes for our customer convenience.

#### Cross Canada Warehousing:

- Vancouver BC
- Calgary AB
- Guelph ON
- Drummondville QC

Northern Technical Solutions 7040 Wellington Road, Guelph Ontario. N1H 6J3

Order: 519.766.9899 Laboratory: 519.766.9752 Fax: 519.837.3300

## Our science is your art.

### Industrial Wood Coatings

When your customers need on-trend color styling for their designs, we've got you covered. With Color Choice® you can create a universe of custom colors, produce them with precision, and reproduce them with consistency. Our market-leading chemistry and comprehensive application knowledge ensure your success every step of the way.

You create the art. Leave the science to us.

# Spray guns for material fed systems

German Engineering

## For Great Finishes - material fed spray guns

**SATA® minijet® 1000 K RP®/HVLP:** Very lightweight and ergonomic material fed spray gun for low viscosity materials or smaller paint jobs.

**SATAjet® 1000 K RP®/HVLP:** Universal material fed spray gun with a wide range of available accessories, e.g. various extensions up to 300 cm length.

**SATAjet® 3000 K RP®/HVLP:** High performance material fed gun with large spray fan and perfect atomisation.

## Coating Thickness Measurement and Compositional Analysis

- Quality and process control of electroplated multilayer and alloy coatings. Great for large or irregularly shaped parts
- Lightweight and mobile for quick, accurate, non-destructive testing
- Can be used as a handheld device, as a fully enclosed desktop unit or integrated directly into production lines

# PosiTector® 6000

## Coating Thickness Gages

Simple. Durable. Accurate.

- **NEW** Faster measurement speed — 60+ readings per minute
- No calibration adjustment required for most applications — measure right out of the box!
- Tough probes, robust housing and strong two year warranty
- All models include Certificate of Calibration
- Includes PosiSoft suite of software for viewing and reporting data

**1-800-448-3835**  
**www.defelsko.com**

**Award Winning Compatibility!** The PosiTector gage accepts ALL coating thickness, surface profile, environmental, soluble salt, Shore hardness and ultrasonic wall thickness probes.

**DeFelsko®**  
The Measure of Quality

  
Made in U.S.A.

DeFelsko Corporation • Ogdensburg, New York USA  
Tel: +1-315-393-4450 • Email: techsale@defelsko.com

## COMPLETE INTEGRATED SOLUTIONS FOR TODAY'S MARKET DEMANDS

- Automatic & manual paint spray guns
- Rotary electrostatic bell atomizers
- Fluid dispense & mixing systems
- Turnkey general industrial systems

**SAMES KREMLIN Inc.**, a manufacturer of Kremlin Rexson & SAMES brand products, delivers comprehensive spray equipment, integrated solutions, and packages for all your finishing & dispensing needs.

## Masking and Part Protection Solutions for Industrial Finishing Processes

[www.daemar.com](http://www.daemar.com)

### Essential Components for Industry

## CAPS & PLUGS

- Silicone Rubber
- EPDM
- Flex 500 Vinyl
- Green & Black Neoprene
- Thousands of standard designs

## TAPES & DISCS

- High temperature applications
- Polyester tapes
- Polyimide tapes
- Glasscloth, Paper & Silicone Rubber
- Standard die cuts in discs, squares and more

## CUSTOM MASKING

- Prototype tooling
- Custom moulded masking
- Custom die cut masking
- Custom hanging solutions

# Caps'n Plugs®

*We have the best prices and fast delivery for all our masking products.*

*If the standard masking doesn't suit then we can design and quote a custom solution.*

*We can provide prototypes of our design in either moulded silicone or 3D printed simulated silicone or approval.*

*We have a very large inventory and the best prices for our standard hi-temp masking products.*

*Free sample parts available for testing.*

*Same day shipping for all in-stock orders.*

*Tape rolls can be slit to any width required in our green or blue polyester, amber polyimide, hi-temp crepe or glass cloth tapes. Popular tape sizes are available from stock.*

*Many standard round, square, rectangular and donut die-cut sizes available.*

*Kits or custom shapes can be quoted with no-charge samples for testing.*

*We stock a large inventory of the most popular paint line hook styles, wire diameters and lengths in our Brampton, Ontario warehouse for immediate delivery.*

# Better protection. Safer chemistry.

## Get greener, safer Flamebloc® chemistries from Buckman.

### Buckman's Flamebloc GS series

**of fire retardants** are formulated to provide outstanding protection for today's natural and synthetic products. Their innovative mix of unique chemistries, including amino functional ammonium polyphosphate, are clear, water-based, and contain little or no VOC. Best of all, they do not require a halogen donor to provide intumescent and char-forming substrate protection. There are many options, too, to help you meet the various standards and specifications required by your industry.

# Buckman

Commitment makes the best chemistry.

#### NEW – Flamebloc Foam Protect

A new intumescent coating code approved (CAN/ULC-S-124) for spray foam insulation.

## Formulation Performance and Problem Solving

# A.S. PATERSON COMPANY LIMITED

Strong technical expertise complemented by exceptional customer service.

A.S. Paterson Company provides customers with access to the technical expertise of our sales representatives, as well as, many leading material suppliers from around the world. Customers gain access to formulation assistance and product testing through supplier laboratories. Finally, we offer assistance in understanding and complying with Canadian regulations.

A.S. Paterson distributes pigments, waxes, resins and other chemical materials right across Canada from multiple warehouse locations. We pride ourselves on being a National distributor with over 85 years of experience serving our customers.

As a result, you will find that A.S. Paterson is a reliable and responsible chemical distribution company who firmly stands behind all of the products we represent.

## THE DISTINCTION IS

ADVANCED  
 COLORANT  
 SYSTEMS,  
 DELIVERED  
 GLOBALLY.

- GLOBAL TECHNICAL AND MANUFACTURING CAPABILITIES
- INNOVATIVE COLORANT TECHNOLOGY
- A BROAD PORTFOLIO OF PRODUCT CHEMISTRIES
- DEDICATED CUSTOMER SERVICE AND SUPPORT

Finding the right colorant for your application is all in the details. By combining the art and science of color with leading technical expertise, Chromaflo Technologies delivers innovative colorant solutions to solve the most complex color, appearance and performance challenges for customers worldwide.

Connecting Chemistry

**BUILDING  
A BRIGHTER  
WORLD**

Paint & Coatings Raw Materials

Globalization and ever more stringent regulation confront the manufacturing industry each year, presenting greater and greater challenges. Brenntag Canada recognizes that the specialty chemicals market does not have to be so complicated, however – we aim to make all aspects of chemical distribution less complex for our customers and suppliers.

Through a dedicated and experienced team of technical experts and sales agents, Brenntag Canada offers tailor-made solutions to each customer's individual needs and business challenges with a degree of professionalism that few of our competitors can match. From providing advice on improving formulations, to devising innovative supply-chain solutions, to sourcing specialty ingredients, Brenntag Canada delivers products and services which put our customers and suppliers a step ahead of the competition.

We at Brenntag demonstrate that the distribution of chemicals and ingredients is not just a business for us. It is an attitude. And our passion is to be the best partner connecting you as our customers and suppliers in local markets worldwide.

## THE SOLUTION IN ENERGY CURING

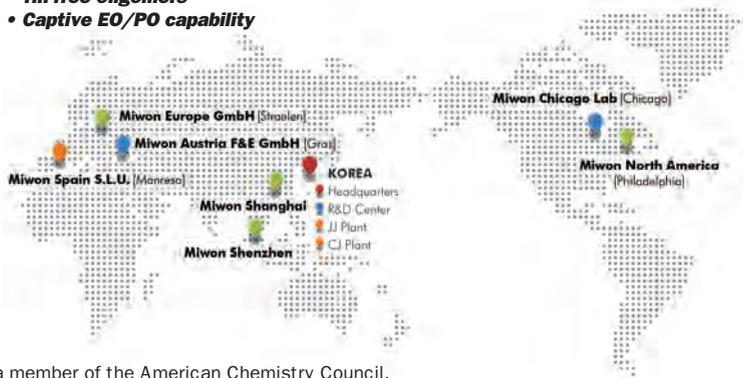

Miwon Specialty Chemical Co., Ltd. is a world-class producer of specialty acrylate and methacrylate monomers and oligomers.

Miwon maintains a global presence – in Asia, North America and Europe – with full-scale production facilities, regional technical support laboratories, regional customer sales/supply support offices and local warehouses.

We are a key raw materials supplier to the inks, coatings, adhesives and electronics industries. As manufacturing raw materials for UV and EB curing is our core business, we offer one of the broadest product lines for formulators utilizing this advanced and environmentally friendly technology.

### Products are engineered to support changing market needs:

- Cross contamination free
- Toluene free (HAP free)
- Consistency in quality
- BPA-free systems
- High purity
- Low residuals
- Low extractables
- High refractive index
- Tin-free oligomers
- Captive EO/PO capability

As a member of the American Chemistry Council, we are committed to the principles of Responsible Care.

# SUSTAINABILITY IS IN OUR CHEMISTRY

PanTINT® Easy Dispersible Powder Pigment Preparations are ideal for aqueous, solvent, and 100% solids systems.

### Colorants disperse in minutes

- High pigment loadings
- 100% solids
- Zero VOC
- Available in resin and non-resin platforms

### Increase production efficiencies

- Mix only
- Reduced production times

# THE CONN BLADE®

Patented blending/dispersing blade design makes radical improvement over old saw tooth designs

- \* Most efficient and aggressive blending/dispersing blade available.
- \* Provides proper combination of pumping action and shear/dispersion essential for fast consistent results.
- \* Built in pumping action cuts processing time.
- \* Longer life due to heavier gauge construction.
- \* Less heat due to shorter required running time.
- \* Excellent for high or low speed and high or low viscosity.
- \* Supplied with hubs or mounting holes required to retrofit and upgrade present equipment.
- \* Pumping blades without teeth are available and are excellent for gentle blending and agitation.

DESIGNERS AND MANUFACTURERS OF INDUSTRIAL MIXING EQUIPMENT

## Multifunctional Neutralizer

Clariant has a new, renewable-based and hazard label-free multifunctional neutralizer, Genamin Gluco 50, and a new advanced stabilizer system, Dispersogen SPS/SPV for 'breathable' biocide-free paints. These offer a step-change to environmentally friendly coatings.

"With architectural paints and especially environmentally friendly solutions expected to grow at an above average rate in the US through 2019, Clariant is excited to introduce new additive solutions that contribute towards a healthier future for the region's thriving indoor paints segment," said Ruzmir Niksic, Clariant's head of regional business line North America for the industrial and consumer specialties business unit.

Genamin Gluco 50 offers formulators the unique chance to reduce formulation complexity with a single additive and keep within the low VOC/SVOC limits of the most stringent regulations and eco-labels. It is suitable for paints certified with an ecolabel such as the US GreenSeal, the German Blue Angel, or the Chinese TenRing. It is also usable for paints that align with very low VOC limits such as those required in Southern California, where only 50 g/L VOC is allowed in fl t indoor paints.

The VOC/SVOC-free, low-odor additive is proven in extensive laboratory testing to boost the lifetime and performance of waterborne paints above current market standards. It achieves this by improving storage stability even in colder regions, increasing tinting strength thanks to better pigment compatibility, and reducing the formation of flash rust on ferrous metals.

It offers these benefits without a y negative impact on properties such as gloss or drying behavior. Paints are also reportedly easy to apply and have a pleasant smell that is desirable in indoor environments.

[www.clariant.com](http://www.clariant.com)

## Wood Coatings Design Tool

Sherwin-Williams, through its Industrial Wood Coatings division, has introduced the Virtual Panel Studio. It describes this as a first-of-its-kind online inspiration tool that provides furniture, kitchen cabinet and other wood product designers access to a complete library of high-resolution images of finished wood panels. These panels can be saved, downloaded, used in renderings and shared with customers or fellow collaborators to inspire future projects, any time and from anywhere.

"We're excited to be pioneers in the industry when it comes to offering wood product designers the ability to securely source the latest colors and finishes on wide array of wood species with the click of a button," said Joe Kujawski, global director of marketing, Sherwin-Williams Industrial Wood Coatings Division. "The Virtual Panel Studio is the fastest and easiest way for designers and product developers to not only find inspiration for a perfect finish but also their competitive edge."

When logged into a password-protected account, wood product designers and product developers can search and save hundreds of high-resolution wood panel images in the latest trending colors and finishes. The panel images are frequently updated, and users can download them in a variety of formats to be used within design software, create private collections for future reference or share with clients or fellow design team members. Sherwin-Williams curated collections are also available for users to learn about the latest in trending finishes, innovative techniques and popular coating technologies.

Once a designer or product developer has identified their favorite panels in the Virtual Panel Studio, they may make an appointment at the Sherwin-Williams Global Color and Design Center (GCDC) in Greensboro, NC, where a team of color stylists can help them bring their proprietary finish to life.

"What's great about the Virtual Panel Studio is that it truly is the first step to the perfect finish. Our talented team of color stylists at the Global Color and Design Center is constantly innovating to help customers maximize the quality of their finishes based on their performance and process requirements," said Lauren West, global color and design manager, Sherwin-

## NEW PRODUCTS

Williams Industrial Wood Coatings Division. "Our suite of color and design tools, paired with our extensive industry expertise, continues to give designers access to best-in-class finishing solutions.

## Lacquer Sensor

Using highly viscous materials in manufacturing processes can become a sticky situation in more ways than one. Clogged flow mechanisms, blocked filter ports, masked windows and solid material build up on moving flows often result in sticking flows and frozen outputs along with inaccurate readings and costly maintenance and down time.

Gill Sensors & Controls Ltd. recently met the challenging level sensing requirements for a varnish manufacturer. During the varnish manufacturing process, plant engineers had problems with being able to reliably measure the level of lacquer in their bulk containers because of its high viscosity and sticky characteristics. Reliability was affected by the tip of the sensors gumming up and providing a false reading. The manufacturer sought a new sensor solution that could provide a reliable alert when the lacquer level dropped to 25 percent capacity. At that level, the containers could be topped-off with additional lacquer to prevent empty containers halting the production process.

Gill's new High Viscosity Liquid Level Sensor Model 7014 met these requirements by means of its proprietary conductive technology specifically designed for monitoring highly viscous (water-based) liquids. The 7014 sensor features an electrically sensitive probe surface and no moving parts or flows. With this design, there is nothing to wear, freeze or clog, allowing for a reliable signal.

## NEW PRODUCTS

reading while at the same time reducing maintenance costs.

The probe also features a wetted area manufactured with FEP (fluorinated ethylene propylene) that has excellent non-stick properties. The smooth sensing surface can differentiate between being immersed in thick liquids versus air (the airspace at the top of the tank or container). The variance between these two readings is used to calculate true liquid level.

"Gill's 7014 sensor technology allows engineers to 'install it and forget it'," says Paul Cain, manager of business development for Gill Sensors North America. "The unique profiling software calibrates each tank or container to obtain gauge readings where a half-tank indication truly means 50 percent of actual level."

The 7014 sensor can be used for level monitoring in water-based paint solids, lacquers, and pulp products along with other aggressive water-based cleaning chemical combinations commonly used in industrial processing. Even in extremely syrupy and sticky viscous materials, a simple service of wiping the probe clean using alcohol will reset the device for re-use.

The 7014's sensor can be mounted in a 'bottoms up' or inverted orientation with no impact on accuracy. The sensor is available with all of the common electrical outputs including Resistive 10-180Ω or 240-33Ω, analog voltage output with both 0.25 - 4.75V DC and 0.25 - 10.0V versions, and current output with 4-20mA. Easy-to-use GUI software includes a programmable switch function (output) that triggers an alarm or warning when the container or tank level has reached the user's preselected point.

The new 7014 Level Sensor solution has immediate availability through Gill's US distribution partner, Everight Position Technologies.

### Online Color Matching

DCC Lansco has launched an expansion of its color matching capabilities for the plastics, coatings and inks industries. It has created an online Custom Color Matching

service as part of its complete customer service offering.

With over 70 years of corporate experience, the company's staff are able to match any color required. Customers can simply insert color and technical specifications in the Colour Matching Portal on the website, and one of the staff will be in contact shortly.

DCC Lansco also offers RAL matching and brand matching services. It will also help with the search for alternatives to lead chromate pigments

[www.dominioncolour.com](http://www.dominioncolour.com)

### Self-Bonding Steel Varnish

Axalta Coating Systems has introduced Voltatex 1175WL and Voltatex 1175WH – low and high viscosity versions, respectively – of a self-bonding electrical steel varnish, to its Energy Solutions' product portfolio. These two new electrical steel coatings replace the standard two component system, so no addition of a hardener or mixing is required. Self-bonding characteristics have become increasingly important in the production of high-quality magnetic cores for stators and rotors. Self-bonding products offer decisive manufacturing benefits as they deliver precise and reproducible adhesion. Voltatex 1175WL and Voltatex 1175WH are designed to minimize any varnish being squeezed out of bonded stacks. Self-bonding properties are therefore in high demand, particularly for the production of wind-turbine generators, but also in the manufacture of motors for electric vehicles (EVs) and hybrid electric vehicles (HEVs).

"These two new Voltatex products offer very user-friendly handling," said Christoph Lomoschitz, global product manager for Axalta's Energy Solutions business. "Because they are one component and offer specific viscosities there is no viscosity adjustment necessary on the line so they are much easier to process, and they have a large curing window. They ensure that our portfolio of products will continue to deliver the outstanding performance that has established Axalta's excellent industry reputation."

Both Voltatex 1175WL and Voltatex 1175WH sustain peak temperature loads up to 180°C with sufficient bond strength. And thanks to the optimized surface quality, coiling, decoiling and punching of coated electrical steel coils

is easy. Voltatex 1175WL and Voltatex 1175WH offer longer shelf life and significantly improved handling with the same technical performance as standard two-component systems.

Voltatex 1175WL and Voltatex 1175WH are supplied in 200 liter drums or 1000 liter containers as a ready-to-use system without needing the addition of hardeners or accelerators.

### Scratch Tester

The Fischerscope ST200 is a progressive load scratch tester for analyzing the adhesion and cohesion strength of coatings according to ASTM C1624, ISO 20502, and DIN EN 1071-3. The instrument is used for measurement in development, quality assurance, incoming inspection and process control.

The Fischerscope ST200.

Typical fields of application include: hard material coatings (PVD, CVD); automotive engine and drive train components; electroplated coatings (decorative, functional); characterization of hard anodic coatings; materials used specifically in medical technology applications; electronic components, connectors, bond wires, etc.; and plasma-applied coating systems.

Features include various measurement modes (constant load, progressive load, incremental load); three analyzing methods (optical microscopy, friction force measurement and acoustic emission measurement); motor-driven XY-stage and Z-axis; and measurements on curved surfaces with motion feed-back control. The unit offers automatic image scans of the whole scratch, and has diamond indenters of various geometries as well as

optical filters for contrast improvement

The tester has integrated electronics, and no external control unit is necessary. There are two microscope objectives that are optional, and four additional objectives.

It offers data and image capturing over the whole scratch length, along with easy creation of test reports. Customized sample holders are optional.

## Silane Coupling Agents

Shin-Etsu Silicones of America, Inc. recently introduced its eight-carbon silane coupling agents. New to the coatings, adhesives, and sealants industries, the KBM-1083 (olefinic functional) and KBM-4803 (epox functional) lines have eight carbons, creating more space between the reactive ends of the silanes.

Typical silane coupling agents have three carbons separating the organic functional group from the inorganic silicon end. These traditional three-carbon spacer silanes create a tighter, more rigid network than their eight-carbon counterparts.

The result of this 'greater space' presents benefits that can be formulated into a wide variety of chemistries. These include: increased reactivity due to easier access to the reactive group; improved adhesion; and enhanced flexibility of the cured resin. Higher filler content is enabled there is greater alkali resistance, and more compatibility with plastics.

KBM-1083, which is olefinic functional has a purity (GC percentage) 90 or higher, and viscosity (25C) of 1.8cSt. It enables higher filler contents increases flexibility of cured resin, and increases alkali resistance and water resistance.

KBM-4803, which is epoxy functional, has a purity (GC percentage) 95 or higher, and viscosity (25C) of 6.6cSt. It increases adhesion and flexibility of cured resin as well as alkali resistance and water

resistance. It also enables higher filler contents

## Acrylate Monomers and Oligomers

Sartomer, a business line of Arkema, is launching a new range of LM (Low Migration) acrylate monomers and oligomers. These are specifically designed for formulation of UV curable inks and coatings, and dedicated to indirect food contact applications.

Many of the standard Sartomer products already respect the general criteria used for the selection of raw materials, including compliance towards specific regulatory standards. Nonetheless, Sartomer is taking this approach one step further, considering the presence of low-level residuals that may have a greater tendency for migration. Hence, each grade within the Sartomer LM range is produced to exacting standards to prevent the risk of cross-contamination, while a comprehensive risk assessment has been conducted to address the presence of NIAS (non-intentionally added substances).

LM product design is also reinforced by a systematic analytical quality control procedure that ensures the finished product conforms to a detailed sales specification. All products contained within the initial offering are REACH and TSCA compliant.

## Hoist Attachment for Drums

Liftomatic Material Handling, Inc. recently introduced the HCB hoist attachment to handle all 55 gallon drums. The HCB hoist attachment safely lifts steel, fiber and plastic drums weighing up to 2000 lb, using Liftomatic's Parrot-Beak drum handling attachment.

The model HCB-BC attaches to any overhead hoist, crane or boom and engages drums automatically. Liftomatic's exclusive mechanical clamping system engages the top lip of the container, assuring a safe and reliable pick-up each time.

Liftomatic HCB hoist attachment.

An adjustable counter-balance on the main frame of the unit allows for safe handling of all drums from 15 to 27 in. in diameter. A padded belt cradle protects the drum sidewall during transport. The model HCB is available in one or two drum configurations, including stainless steel units for food grade and pharmaceutical applications.

## System for Safe Sampling

CCS sampling system.

The CCS Controlled Containment System is engineered to safely contain and control airborne particulate from sampling procedures. Dispensing from drums and weighing procedures are typical applications.

Drums or equipment can be easily rolled into the enclosure through the strip curtain entrance. Both the process and surrounding environment are protected from contamination. A downward flow of HEPA filtered air maintains a cleanliness level at drum or working height while all exhaust air exits out through HEPA filter in the rear wall at floor level. The interior is under slight negative pressure to ensure that no contaminant escapes out of the enclosure.

The CCS Enclosure locates directly on the existing floor. Optional roll and set casters are available for mobility, electrical and plumbing service fixtures, tables with work surfaces and enclosure floors are available. The unit is shipped assembled.

CANLAK

# HIGH QUALITY INDUSTRIAL WOOD COATINGS

**DARE TO TAKE A CLOSER LOOK**

## LACQUERS & VARNISHES

All our products have excellent non-yellowing properties, they dry rapidly and respect the most updated norms on VOC and HAP regulations.

## UV CURED SYSTEMS

These products are custom-made and specifically designed for your production line.

## WATERBORNE FINISHES

All of our series are competitively priced, low in VOC and formaldehyde free.

## POLYESTERS & POLYURETHANES

Highest performing European technology available on the market.

## SPECIALTY PRODUCTS

We also develop products on demand for metal, plastic and more.

**ASK FOR A SAMPLE !**

*EMCO Chemical Distributors Canada Ltd. and Inortech Chimie Inc. are now*

**INORTECH**

*The synergies of EMCO Chemical Distributors Canada and Inortech generate a full line specialty distributor and a leader in the CASE, Ink and Plastic industries.*
