Dow Corning® Superwetters for Improved Wetting in Coatings, Paints, Inks and Overprint Varnishes

DOW CORNING

Create a performance breakthrough with Dow Corning.

Achieving effective wetting can be a challenge for formulators of waterborne and UV coatings, paints, inks and overprint varnishes.

That's why Dow Corning developed its innovative family of **superwetting silicone additives**. These new materials provide consistent wetting performance across a wide range of formulations and substrates, including difficult-to-wet surfaces like wood, plastic and metal.

Learn how you can create formulations with great wetting performance.

Visit dowcorning.com/powerup.

*Univar partners with
Dow Corning to provide
you innovative new
products.*

NORTH AMERICA'S LARGEST METAL FORMING, FABRICATING, WELDING AND FINISHING EVENT

DEMONSTRATING OUR

FUTURE

The future — your future — is on full display at FABTECH. From 1,400+ exhibits with end-to-end solutions in metal forming, fabricating, welding and finishing, to the industry's leading education and peer-to-peer networking, this is your opportunity to capitalize on the future.

The answers and know-how you need for the challenges of tomorrow **for finishers** can be found at FABTECH. Visit fabtechexpo.com for complete event details. **REGISTER TODAY!**

Company Alphabetical Listings

A & W Products, Inc.

1041 Astondale Road, Bishop, GA 30621
P 706-769-9012
info@aw-products.com
www.aw-emulsions.com

Contact: Walker Whitmire

A & W Products manufactures a complete line of wax emulsion formulations for paints and coatings, treated wood products, engineered wood, and coated paper. Our additives are paraffin, carnauba, slack wax, soy wax, and silicone blends. We can custom formulate a product for your specific needs.

A Brite Company

3217 Wood Drive, Garland, TX 75041
P 214-291-0400 F 214-291-0300
fdunigan@abrite.com
www.abrite.com

Contact: Harry Hassell

A Brite is a unique American owned international business involved in the development, manufacturing and marketing of a full line of proprietary chemicals for the plating, anodizing, aluminum extrusion, phosphate, powder coat and environmental industries. Processes include: cleaners for all base metals including aqueous and special purpose; plating processes for silver, zinc, zinc alloys, copper, nickel, chrome, chrome substitutes, tin and cadmium; metal treatment products for bright dipping, phosphating and specialty products including chr Hassellomates, lacquers, rust preventatives and environmental products for waste treatment needs.

A.S. Paterson Company Limited

1110 Sheppard Ave. East - 404,
Toronto, ON M2K 2W2
P 416-222-3333 F 416-222-5034
rpaterson@aspateron.com
www.aspaterson.com

Contact: Rod Paterson

A.S. Paterson Company is a 90 year old Canadian distributor of pigments, dyes, waxes, resins and additives for the paint, coatings, ink, plastics and specialty chemical industries. Technical sales representatives located across Canada help companies solve problems.

See Our Ad on Page 84

ABB Inc.

201 Westcreek Blvd, Brampton, ON L6T 5S6
P 905-460-3000 F 905-460-3019
www.abb.ca

ABB is a leading supplier of industrial robots – also providing robot software, peripheral equipment, modular manufacturing cells and service for tasks such as welding, assembly, painting, picking, packing, palletizing and machine tending. Key markets include automotive, plastics, metal fabrication, foundry, pharmaceutical and food and beverage industries. A strong solutions focus helps manufacturers improve productivity, product quality and worker safety.

ACE Equipment Company

4725 Manufacturing Road,
Cleveland, OH 44149
P 216-267-6366 F 216-267-6366
sheran@armaturecoil.com
www.armaturecoil.com

Family owned since 1919, ACE Equipment manufactures Burn Off and Curing Ovens. The unique design provides high efficiency, uniform temperatures and long life.

Aceto Corporation

4 Tri Harbor Court, Port Washington, NY 11050
P 516-627-6000 F 516-627-6093
rgoodman@aceto.com
www.aceto.com

Contact: Roy Goodman

Aceto Corporation offers a wide range of chemicals for specific use in epoxy, urethane, UV-cured, powder, and polyurea coatings. These include a number of performance additives and a complete line of organic pigments, TiO2 and free-radical and cationic photoinitiators.

ACT Test Panels LLC

273 Industrial Dr, Hillsdale, MI 49242
P 517-439-1485 F 517-439-1652
sales@acttestpanels.com
www.acttestpanels.com

A wide range of test panel products and services including ACT Certified Test Panels for coatings R&D; utility grade TRU panels for spray outs and hiding evaluations; appearance panels including color, orange peel, and powder smoothness standards and corrosion supplies for laboratories.

Adroit Automation, Inc.

704 California Avenue, Rochester, PA 15074
P 412-292-0127 F 412-220-3066
andrew@adroitblue.com
www.adroitblue.com

Contact: Andrew Maude

Adroit produces turnkey automated process lines. All systems are designed and commissioned by in-house employees; including controls, hoists, tanks, ventilation and WWT. Adroit's software package WinHoist optimizes random loading, integrates all process equipment and provides full data documentation "quality compliance in-a-box."

Advanced Chemical Compay

105 Bellows St, Warwick, RI 02888
P 800-553-3568
rcarvalho@advchem.com
www.advchem.com

Contact: Robert Carvalho

Incorporated in 1972, Advanced Chemical Company operates as a full service precious metals refiner of gold, silver, platinum, palladium and rhodium. ACC holds the following certificates: ISO-9001:2008, ISO-14001-2004, OHSAS 18001, R2,ITAR. A leading manufacturer of proprietary precious and non-precious metal electroplating processes and many other specialty chemicals.

Adwest Technologies, Inc., A CECO Environmental Company

1175 North Van Horne Way,
Anaheim, NY 92806
P 714-632-9801 F 714-632-9812
bcannon@cecoenviro.com
www.adwestusa.com

Contact: Brian Cannon

Adwest is a CECO Environmental Company and has installed over 1000 RETOX Regenerative Thermal Oxidizers for 99 per cent VOC control for finishing, spray booth, surface coating and curing oven applications. RETOX RTOs provide Flameless NOx-Free operation with up to 97 per cent primary heat recovery for low energy consumption.

AGC Chemicals Americas

55 E. Uwchlan Ave., Exton, PA 19341
P 805-583-5917 F 805-583-5917
winn.darden@us.agc.com
www.lumiflonausa.com

Contact: Winn Darden

Supplier of LUMIFLON fluoropolymer resins used to make ultra-weatherable coatings for architectural, industrial maintenance, aerospace, alternative energy, and automotive applications. Products include solvent based resins, solid resins for low VOC coatings, water based resins and powder coating resins.

Akzo Nobel Wood Coatings Ltd.

155 Rose Glen Rd, Port Hope, ON L1A 3V6
P 905-885-6388 F 905-885-7587
chemcraft.ca@akzonobel.com
www.chemcraft.com

Contact: Jeff Snyder

AkzoNobel manufactures a complete line of stains, lacquers, catalyzed coatings, urethanes, polyesters, and UV-cured wood coatings available either directly from the factory, or through extensively trained distributors who offer local service and delivery.

See Our Ad on Page 31, 39

AkzoNobel Powder Coatings

150 Columbia Street, Reading, PA 19601
P 800-367-3318 F 610-603-7584
www.interpon.com

AkzoNobel Powder Coatings is a world leader in powder coatings, offering effective coatings solutions for a wide range of applications including: furniture, automotive, IT, appliance, the architectural market and general industry.

Alberdingk Boley Inc.

6008 High Point Road, Greensboro, NC 27407
P 336-454-5000
ngott@alberdingkusa.com
www.AlberdingkUSA.com

Alberdingk Boley is an international manufacturer of water-based resins. Our environmentally friendly and innovative dispersers help refine formulations for coatings, paints, varnishes and multiple substrates, including wood, concrete, textiles and leather. We produce a variety of products including styrene acrylics, polyurethane dispersions and water based UV dispersions.

See Our Ad on Page 74

Aldonex, Inc.

2917 St. Charles Rd., Bellwood, IL 60104
P 708-547-5663 F 708-547-5738
sales@aldonex.com
www.aldonex.com

Contact: Alan Miller

Aldonex, founded in 1967, has grown to a major National and International Corporation and a leading Manufacturer of DC Power Supplies. Design and wind all of its transformers and cut all of its own iron. Products include, Aldonex SCR Rectifiers, Manual or Motorized variable transformers, Aldonex tap-switch rectifiers, Periodic reversing units, Water cooled rectifiers, SCR pulse rectifiers, Modular power supplies, and Switchmode power supplies. Also offer, new and used D.C. power supplies and other equipment, parts and service.

Allcolour Paint Limited

1257 Speers Road, Oakville, ON L6L 2X5
P 905-827-4173 F 905-827-6487
rchapman@allcolour.com
www.allcolour.com

Contact: Ms. Gwen McManus

Allcolour produces a wide range of high-quality, high-performance coatings for OEM, general industrial, and DBO-duty applications. In business for over 40 years, Allcolour offers the latest technology, environmentally responsible products manufactured in a completely renovated state-of-the-art facility.

Alliance Industrial Masking

257 Hopeland Street, Dayton, OH 45417
P 937-222-3394
chris@alliancemfg.net
www.custommasking.net

Contact: Chris Gray

Provider of custom tape masks with the advantage of next day delivery. With the innovative manufacturing process no die is required, that means no die manufacturing fee and no lead time. Eliminate costly hand masking procedures, and improve quality and production.

Allied Can Manufacturing Inc.

56 Bramsteele Road, Unit-6,
Brampton, ON L6W 3M5
P (905) 450-5100 F (905) 450-5101
awan@alliedcans.com
www.alliedcans.com

Contact: AFZAL M. AWAN

Manufacturer & Distributor of Paint Cans (Unlined & Gold Lined), Montop Utility Cans, Aerosol Cans, F-Style Oblong Cans, Cone Top (Pour top) Cans and U.N & Non U.N Steel Pails (Open Head & Close Head).

Allied PhotoChemical Inc.

48 N. Airport Dr., Kimball, MI 48074
P 810-364-6910 F 810-364-6933

Duroair Corporation

3295 Mainway, Burlington, ON L7M 1A6
P 416-988-7576 F 905-397-1072

ryan@duroair.com**www.duroair.com****Contact: Ryan Watt**

Duroair is a leader in innovative airflow and filtration technology. Can manufacture any size enclosure and will match the airflow required to produce the perfect finish, quality and compliance. Duroair's retractable enclosures are a cross draft design where the amount

of airflow is increased during the dry cycle to wick the moisture out of the paint and achieve faster dry times. The patented tapered airflow focuses the air down the center of the enclosure with almost no airflow down the walls, ceiling or floor. This allows for the optimal capture of overspray and reduces any dust or dirt transfer. The enclosure retracts to less than 20 per cent of the extended length saving you your valuable floor space when not in use. The system can be assembled or torn down in approx in hours, not days to allow for portability from site to site.

Duro-Lak inc

Viking Pump Canada is a manufacturer and distributor of quality pumping equipment in Canada since 1924.

Viron International Corp.

505 Hintz Road, Owosso, MI 48867
P 989-723-8255 F 989-723-8417
jchapman@virointl.com
www.virointl.com

Contact: Jim Chapman

Viron is a custom manufacturer of corrosion resistant ventilation system for industry. Fabricate complete vent systems including exhaust hoods, duct (including FM Approved PVC duct systems), chemical fume scrubbers and exhaust fans from PVC, CPVC, Poly Pro and FRP.

Vitraccoat America Inc.

2807 Marina Dr., Elkhart, IN 46514
P 574-264-6090
mmarin@vitraccoatamerica.com
www.vitraccoat.com

Contact: Miguel Marin

Powder coating manufacturing company. Over 1,600 stock colors. Custom color program, small batches. Thermoset epoxies, hybrids, polyester TGIC and TGIC free, urethanes, Super Durable, Corrosion Resistant, MDF, UV curable, Bonded metallic, POP display and OEM approvals, appliance, architectural and high temperature powders.

Vitro Minerals, Inc.

1505 General Arts Rd., Conyers, GA 30012
P 678-729-9333 F 770-750-0105
turner@vitrominerals.com
www.vitrominerals.com

Contact: Jerry Turner

Vitro Minerals' LA and CS Glass fillers are produced from post-industrial or post-consumer glass, are white in color, inert, have very low oil absorption, are crystalline silica free and will reduce the carbon footprint of your products. These "green" fillers can replace traditional mined mineral fillers such as calcium carbonate, mica, wollastonite, silica and nepheline syenite in paint, powder coatings, adhesives, and sealant applications. Products are available from 4 to 325 mesh.

VRSim, Inc.

222 Pitkin St., East Hartford, CT 06108
P 860-893-0080 F 860-893-0079
kristin.bodner@vrsim.net
www.vrsim.com

VRSim creates virtual reality training systems designed to enhance basic skills training for military and defense organizations, industrial trades, and education and research groups. VRSim is the power behind SimSpray, an instructional tool that trains painters and coaters faster while reducing training costs.

Vulcan Catalytic Industrial Infrared Oven Systems

DYNAMIX Blending Technology, Service and Value

Dynamix is the largest Canadian owned manufacturer and supplier of metal finishing chemistry. "The philosophy at Dynamix is simple - enhance our customers' performance and profitability, while dealing with all of our partners in an open and honest forum."

The primary focus of Dynamix is the design and manufacture of specialty chemicals for the metal finishing industry, covering all aspects of metal finishing from anodizing to zinc plating. Toll blending, packaging and distribution of custom formulated products are also available.

We offer a service that encompasses all of our values with a highly skilled and motivated team. The laboratory at Dynamix is well equipped and able to provide analytical solutions specific to a particular sector of industry and/or customer. Products are designed at Dynamix to provide unsurpassed performance and solution economy. Superior chemistry is only the beginning, as the company realizes that technical and application knowledge are just as vital to the metal finishers' success.

Let Dynamix demonstrate how we can maximize your plating chemistry productivity by providing the most robust chemical processes available.

FUNCTIONAL COATINGS

- Anodizing Chemistry
- Black Oxide Processes.
- Conversion Coatings.
- Copper Processes.
- Electroless Nickel Processes.
- Electropolishing Processes.
- Hard Chromium Processes.
- Phosphate and Phosphate free coatings.
- Tin Processes.
- Zinc and Zinc alloys, Chromates and Topcoats.

DECORATIVE COATINGS

- Copper/Nickel/Chrome Processes.
- Copper and Brass Processes.
- Bright/Dull/Satin Nickel Processes.
- Tin Processes.
- Antiquing Processes.

SPECIALTY PRODUCTS

- General purpose and heavy - duty cleaners for all substrates and applications.
- Metal strippers.
- Paint strippers for use on ferrous and non-ferrous substrates.

Chemcraft®

A Great Finish is Only the Beginning

Pentco Industries Inc. speaks out about great products and great relationships

We traveled to Surrey, just outside of Vancouver, BC, Canada to talk with Pentco about why they like working with Chemcraft products and with their Chemcraft distributor, Omega Coatings.

Pentco Industries Inc. was founded in 1979 and is one of Western Canada's largest manufacturers and distributors of cabinet doors. They produce industry leading products for single/multi residential developments, and commercial and institutional projects.

"We do a lot of multi-family high rises," said John McNulty, one of Pentco's two owners, "You can't have inconsistent colors rolling through hundreds of units. That's when we started using Chemcraft."

"Every company has a good, better, best product. Chemcraft has the greatest - Chemlife 24."

Chemlife® 24 Conversion Varnish

"Chemlife 24 has great fill, you can use it as a self-seal and it has higher solids than most products out there." continued McNulty.

"It's a go-to product. Very user friendly and cost effective. Using this product, you can cut waste by up to 30%. Consistent. Sprays the same every time." said McNulty.

"Pentco is known for quality products. We have to feel confident that every cabinet door lives up to what we say it will. That's why we have to use good coatings - and that's why we have to have good support. We can't wait a 'couple of days' for someone to show up."

"Our Chemcraft distributor representative is in here all the time." McNulty said, "Having

Front, L to R: Dallas McNulty - Manager, Pentco Industries. John McNulty - Owner, Pentco Industries. Sandra Filoosof-Schipper - President, Omega Coatings. Back, L to R: Frank Brams - Sales Representative, Omega Coatings. Ian Jackson - Owner, Pentco Industries.

someone like Frank (Brams) to bounce problems off of and bring you solutions is key."

"We have sales reps in here constantly trying to get us to switch," said Dallas McNulty, Pentco's Manager. "So I asked one rep, how many changes of clothes do you have in your car? And he said to me, 'what are you talking about?' I said, 'Exactly!' Frank will stick his head in a machine and get dirty to insure our products are 100%, so he keeps a couple of changes of clothes in his car."

"That's the difference Omega and Chemcraft bring; you're buying insurance when you buy good coatings and work with good people."

Visit chemcraft.com to locate your nearest distributor.

SATAjet® 3000 K

German Engineering

High Efficiency Pressure Fed Gun High Performance Spray Equipment for Flawless Finishes in Industrial Applications

SATAjet 3000 K HVLP & RP, designed for painting large surfaces with a flawless finish result. The large spray pattern, optimal material delivery, and fine material atomisation paired with the ergonomic balance make the SATAjet 3000 K a perfect gun to meet high expectations of quality.

GENUINE

QUALITY AND PERFORMANCE

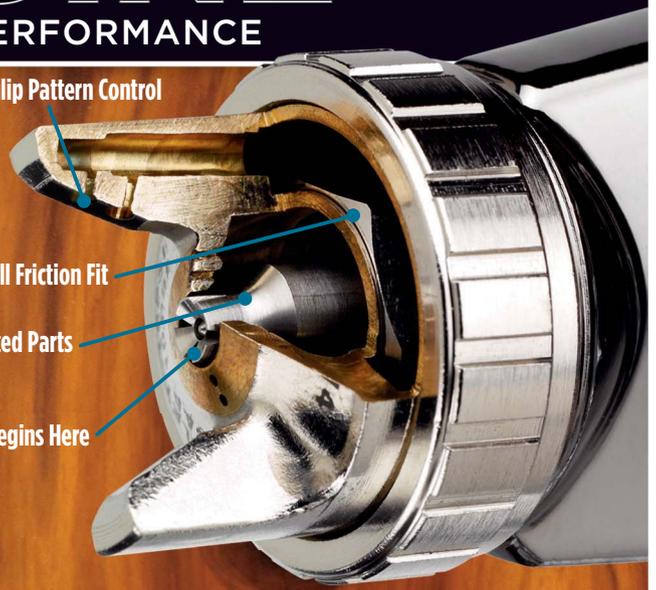

Our Patented LV Technology nozzle design combines a higher fluid delivery that facilitates a faster, smoother application. The result is a higher transfer efficiency rate resulting in greater material savings.

Final Tulip Pattern Control

No Gaskets, All Friction Fit

Stainless Steel Wetted Parts

Atomization Begins Here

What Makes The Industry Leaders Insist On ANEST IWATA

PERFORMANCE

Brilliant performance backed by exceptional customer service and technical expertise.

ATOMIZATION

Patented "LV Technology" split tip nozzles create unmatched transfer efficiency and material savings.

COMMITMENT

Tireless dedication and enduring commitment to your ideas finished to perfection.

Measuring very thin coatings with FISCHERSCOPE® X-RAY XDV®-SDD

X-Ray fluorescence measuring instrument with silicon drift detector for the high demands of coating thickness measurement and material analysis.

Typical fields of application

- Measurement of coating systems on connectors, leadframes and PC boards
- Trace analysis and detection of harmful substances
- Analysis of Au/Pd/Ni/Cu coatings
- Measurement of phosphor content in electroless nickel
- Electronics and semiconductor industries
- Research, development, quality assurance
- Process qualification, production control and incoming inspection

We control the cloud

Getting the powder on the part is what really matters and nobody controls the process like Gema

Not all powder clouds are created equal – in fact, many create less-than-desirable results. Factors such as powder type, part geometry, application environment and operator skill can all affect coating consistency. Results vary widely and can severely impact your operation’s bottom line.

Gema’s powder coating technology has been precisely designed to do one thing – deliver the right powder cloud for any given application.

Gema’s manual and automatic powder coating systems work seamlessly to merge the right cloud density with the right particle charge and air balance. Gema gives anyone the confidence to spray any powder on any part in any place.

Gema
 The Global Leader in Powder Coating Technology

PosiTector® 6000

Coating Thickness Gages

Simple. Durable. Accurate.

- Rugged, weatherproof, ergonomic design
- All models include memory, statistics, HiLo alarm and a USB port
- **PosiTector 6000** accepts all **DPM, SPG, and UTG** probes easily converting from a coating thickness gage to a dew point meter, surface profile gage or ultrasonic wall thickness gage with a simple probe change

Now Advanced models come with **WiFi** and **PosiSoft Mobile** for complete portability and expanded functionality.

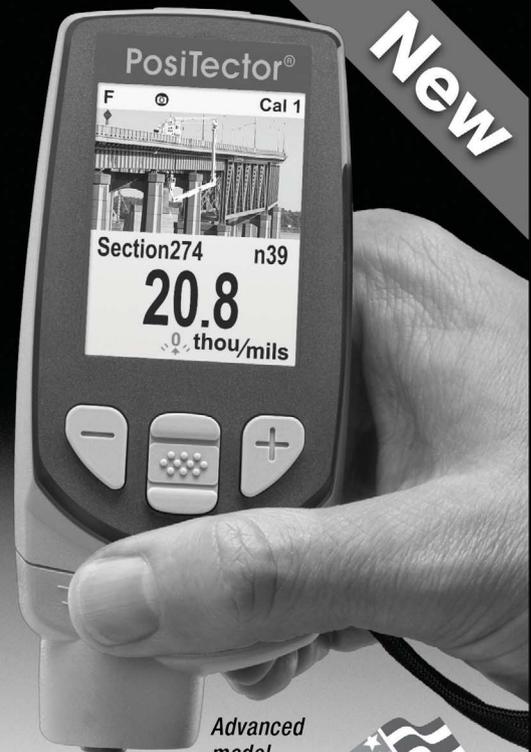

A free web-based application www.Positector.net offering secure centralized management of thickness readings

Clip-On Nozzle with Quick-Disconnect Tip!

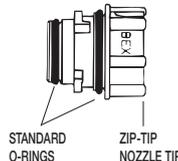

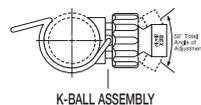

MOLDED PLASTIC QUICK DISCONNECT

K-BALL® / ZIP-TIP® SPRAY NOZZLES

US PATENT 5,421,522 OTHER PATENTS PENDING

- No tools required for ZIP-TIP nozzle tip installation or removal
- Once you set your spray pattern, you can remove and clean the tips without disturbing the alignment
- Seals located on and removed with nozzle tip for easy flushing
- Standard double Viton "O"-ring seals
- New seals supplied with each new nozzle tip
- Reduces maintenance time and cost by a simple 1/4 turn of the nozzle tip
- More models and spray patterns available
- Only BEX Clip-ons offer the unique "finger" positioning system

**MAKE YOUR INVESTMENT
 FUTURE-PROOF AND
 MINIMIZE YOUR
 CONSEQUENTIAL COSTS**

Venjakob, the well-known German manufacturer of surface and conveying technology, produces and installs complete system solutions from pre-treatment followed by the painting process, conveyor and handling equipment through to drying and exhaust air filtering. We offer you cost-saving, state-of-the-art solutions engineered to your specific needs!

**COLOR CHANGE
 <60 SECONDS
 WITH QUICK COLOR
 CHANGE SYSTEM**

Individual system technology
VEN SPRAY PERFECT

- Short paint change times with minimal paint loss
- Maximum plant availability
- Energy efficiency through recirculated-air operation
- Effective exhaust-air filtering
- Mono-material recovery

PosiTector® *RTR*

Replica Tape Reader

Digital spring micrometer measures peak to valley surface profile height using Testex™ Replica Tape

- Improved accuracy over conventional spring micrometers
- Retains a digital record of replica tape measurements for downloading and reporting
- Probe connects to ALL current PosiTector gage bodies

TOGETHER WE ARE MORE
POWERFUL

American Plating Power presents a robust offering of value-added services that provide benefits many standard providers cannot. We supply custom power solutions for both new facilities and existing operations with technologies already in place. Clearly designed to give your company a competitive edge!

- Technologies designed and manufactured to meet clients' individual specifications
- Products tested under full load conditions and inspected for quality before shipment
- Focus on client relationships to instill confidence and provide project synergy

When Quality Counts ... Count on TITAN!

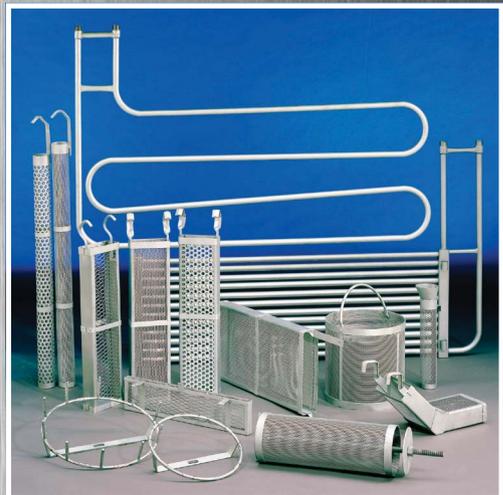

QUALITY PRODUCTS • QUALITY SERVICE • QUALITY EXPERIENCE

*Trusted by Industry Around The Globe For
 Corrosion-Resistant Metal Finishing Equipment*

- Anode Baskets
- Immersion Heating & Cooling Coils
- Tanks & Tank Liners
- Auxiliary Anodes
- Shell & Tube Heat Exchangers
- Custom Fabrications

MiniTest 70 & 700 Series with SIDSP®

Coating thickness testing gauges for coatings applied over metal substrates

From the manufacturers
 of the eXacto®

MiniTest 700 Series

- 720 built-in probe
- 730 probe on a lead
- 740 user selectable probe configuration

With SIDSP® Digital Sensors

Analog signal processing has served its time
 SIDSP® Digital signal processing is the future

- User selectable units of measure mils/μm
- Ferrous, Non-Ferrous and “combo” models
- Highest accuracy
- Repeatability and Resolution

MiniTest 70 Series

- Portable
- Reliable
- Accurate

ElektroPhysik USA Inc.

advancing with technology

Coating thickness and coating related quality control and physical test instruments

Exclusive agent for Sheen Instruments...viscosity, film application, adhesion, color, gloss and physical test devices

Paint & Coating Raw Materials

GLOBAL PARTNERS | LOCAL SOLUTIONS

Ferguson Chemical Innovation is a Canadian chemical supplier. We represent a trusted portfolio of products and technologies from industry leading suppliers, supporting manufacturers of coatings, adhesives, graphic arts, rubber and plastics.

- * colour & effect pigments
- * performance additives
- * resins & polymer
- * speciality chemicals

Our qualified and technically experienced personnel are the strength of our organization.

We look forward to exceeding your expectations!

Effect Pigments

The ECKART Effect: creating infinite attraction in an attractive market

ECKART offers a complete range of effect pigments for the Coatings and Plastics Industries.

*Automotive *Industrial *Powder *Plastics

- Customized solutions for all applications
- Strong formulation and application experience
- Dedicated Service
- Solution Provider
- State-of-the-art technology

NEW

VANADUR®

**VANADUR® 2108 –
a must-see Bismuth
Vanadate**

VANADUR® 2108 is a new green shade Bismuth Vanadate Pigment. It is the compelling result of a consequent development work based on the world-wide well established VANADUR® product range.

VANADUR® 2108 shows extraordinary high tinting strength and very good hiding power combined with high durability, chroma and dispersibility.

The high tinting strength opens a new economical dimension for end-users in the formulation of decorative, industrial, powder, coil and automotive coatings.

Based on a zinc-free technology it can significantly contribute to ecological-economic balanced paints.

Bismuth Vanadate Pigments

Best Under the Sun

With exceptional tint retention, chalk resistance and photo-chemical stability, MINEX® additions can enhance the color and extend the service life of aqueous and solvent based architectural paint. Forty years of real time exterior exposure tests verify MINEX is the best functional filler under the sun.

World-class products, comprehensive support and uncompromising service

At L.V. Lomas we have over five decades of service, helping industrial formulators meet and exceed the most demanding objectives. As one of the largest specialty chemical distributors in Canada, our technical sales and marketing teams work with our customers to provide the winning solutions to succeed.

When you make L.V. Lomas your partner, we make our success contingent upon yours.

High Performance Coatings Additives

Manufacturer / Supplier

For over eight decades and four generations, King Industries, Inc. has consistently manufactured high quality, high performance additives, which increase the efficiency and performance of our customers' formulations.

Technical Sales

Every technical sales person at King Industries has a degree in chemistry or Chemical Engineering. Our team will work hard at understanding your needs and performance requirements, and recommend additives to help solve specific problems and achieve your performance targets.

Technical Service

We measure success by the relationships we make and keep. Customers are given the opportunity and encouraged to work with our highly experienced technical service chemists to ensure the best product is selected and that your Coatings, Lubricant, Electronic, or Rubber formula is performing at its best.

Research and Development

We consider our chemists and Ph.Ds to be some of the best in the world. Our R&D team is dedicated to understanding our markets and customers' applications on a molecular level. Our R&D team is pushing the envelope and breaking new ground by discovering and bringing to market the latest advances in technology.

Better protection. Safer chemistry.

Get greener, safer Flamebloc® chemistries from Buckman.

Buckman's Flamebloc GS series of fire retardants are formulated to provide outstanding protection for today's natural and synthetic products. Their innovative mix of unique chemistries, including amino functional ammonium polyphosphate, are clear, water-based, and contain little or no VOC. Best of all, they do not require a halogen donor to provide intumescent and char-forming substrate protection. There are many options, too, to help you meet the various standards and specifications required by your industry.

Buckman

Commitment makes the best chemistry.

Paint & Coating Raw Materials

Register For A Diploma In Coatings Technology

CANADIAN PAINT AND COATINGS ASSOCIATION

ASSOCIATION CANADIENNE DE L'INDUSTRIE DE LA PEINTURE ET DU REVÊTEMENT

Training courses are now **online** and will enable members' staffs and partners to get training as needed. Once the training is completed, successful candidates will receive a Diploma in Coatings Technology. This is an opportunity for members to provide necessary skills training to retain effective staffing levels. The three levels of training available via CPCA are shown at right.

Theoretical Concepts

The course is designed to provide the theoretical basics of coatings technology for young people who are just entering the industry, or who have been working in the industry for some time but who want to upgrade their status in the industry by earning a Diploma in Coatings Technology.

Industrial Paint Applicators

In view of the complexity of most industrial coatings, the course is recommended to industrial paint applicators who need to be able to appreciate the composition, performance capabilities and handling of the products they purchase and use.

Sales and Marketing

Designed for those working in a non-technical role such as purchasing of raw materials, production scheduling or sales or marketing, and who may not be interested in the Diploma as such. These candidates do not need to sit for the examinations and may enroll in only one semester to gain expertise in a subject of particular interest to them.

Learn more about our online courses:

CanPaint.com/training-and-education

Online training for TDG and WHMIS is also available for members and non-members.

Your Complete Coatings Source

Chemroy provides **EFFECTIVE, INNOVATIVE** and **RELIABLE** coating system solutions

Our Technical Specialists can help you with:

- Biocides -UV Resins
- Coalescent Agents
- Dispersants and Surfactants
- High Solid Resins
- Pigments
- Rheology Modifiers
- Surface Modifiers
- TiO₂ Replacement
- Waterborne and Solvent Resin Systems
- UV Light Stabilizers
- UV Resins

All From the Manufacturers You Trust

- AGC • Arkema • BASF • Creafil Fibers
- CVC/Emerald • Dow • Dura Chemicals • Elementis
- FP Pigments • Hoover • Huntsman • Lubrizol
- Lonza • NYCO Minerals • PPG • US Polymers

Together we go beyond chemistry
Ensemble nous allons au-delà de la chimie

Distributing specialty raw materials to the coatings, inks, plastics and adhesives industries.

We are the only Canadian distributor with a state of the art laboratory providing innovative solutions.

We are your active intermediate.

Distributeur de matières premières de spécialités aux industries de la peinture, de l'encre, du plastique et des adhésifs.

Nous sommes le seul distributeur canadien avec un laboratoire à la fine pointe de la technologie pour des solutions novatrices.

Nous sommes votre intermédiaire actif.

Formulation Performance and Problem Solving

A.S. PATERSON COMPANY LIMITED

Strong technical expertise complemented by exceptional customer service.

A.S. Paterson Company provides customers with access to the technical expertise of our sales representatives, as well as, many leading material suppliers from around the world. Customers gain access to formulation assistance and product testing through supplier laboratories. Finally, we offer assistance in understanding and complying with Canadian regulations.

A.S. Paterson distributes pigments, waxes, resins and other chemical materials right across Canada from multiple warehouse locations. We pride ourselves on being a National distributor with over 85 years of experience serving our customers.

As a result, you will find that A.S. Paterson is a reliable and responsible chemical distribution company who firmly stands behind all of the products we represent.

Accurate, non-destructive plating thickness measurement with FISCHER instruments

High-precision X-ray fluorescence devices

For the exact determination of the thickness and composition of metallic coatings

- Measurement of multilayer systems such as Cr/Ni/Cu, ENEPIG and Nickel Phosphate
- Determination of phosphorus content in NiP coatings
- Analysis of metal concentration in electroplating baths
- For use in research, manufacturing and production

**Powerful hand-held devices**

For precise coating thickness measurement

- Measurement of plating coatings such as chromium, copper or zinc in small parts such as screws, nuts and bolts
- Measurement of anodic coatings
- Large selection of high-precision probes

FISCHER DataCenter software for easy data transfer and analysis.

THE CONN BLADE®

MIXING - BLENDING - DISPERSION

THE NEXT GENERATION

**** NOW AVAILABLE OF U.H.M.W. POLYETHYLENE ****

- * Less frequent blade changes = Less down time = Less cost
- * Most efficient and aggressive Poly Blade available.
- * When leading edges are worn, blade can be turned over to start like new.
- * Also available of polyurethane, nylon, teflon, polypropylene and other materials.
- * Traditional stainless Conn Blades readily available.
- * Call or e-mail: info@connblade.com for pricing and availability

Since 1948

CONN AND Co., L.L.C.

Value-Added Membership

As the recognized voice of the paint and coatings industry in Canada, CPCA has been dedicated to taking collective action for more than 100 years. Consider just a few of the issues before the industry:

Globally Harmonized System for Labeling

How much will proposed new labeling regime for chemicals in the workplace cost you and how can it be reduced?

Low-level VOC Emissions

Will your products survive further reductions in VOC limits and still perform and sustain your business over the long term?

Chemicals Management

Are you aware of the current, ongoing assessment of the chemicals used in your products with new risk management actions required for many? Are your products compliant and do you care about which products might be banned or regulated in future and how that will be done?

Product Stewardship and Sustainability

Are you compliant with stewardship regulations and do you want to help shape the future of new regulations imposed by government on your business?

Top 3 Reasons to Join

- 1 Know what is being done to your business now, not after the fact
- 2 Take action and provide input to ensure your business can grow and prosper
- 3 Share the responsibility to counter measures that threaten your paint and coatings business and future trade

Stronger Together: CPCA provides the strength, commitment and resources to help you get informed, stay connected and sustain your business.
