Your active intermediate

Ethics, Commitment, Loyalty

Three basic principles that have earned Inortech an enviable reputation for honesty, integrity and unparalleled customer service. These fundamental principles have attracted highly qualified employees. Their varied expertise positions us to better understand and meet customer needs and supplier expectations.

Our unique technical service and R&D laboratory provides an added dimension to the in-depth technical expertise and cutting edge technology for which Inortech is already recognized.

The Inortech team constantly strives to improve customer service and increase our supplier's visibility in the focused markets we serve: coatings, ink, adhesive, and plastic.

Together we can go... **BEYOND**
chemistry

INORTECH
CHEMIE INC.

Votre intermédiaire actif

Éthique, Engagement, Loyauté

Voici trois principes de base qui ont valu à Inortech son enviable réputation d'honnêteté et de service à la clientèle inégalé. Ces principes fondamentaux ont attiré du personnel de haut calibre. Leurs expertises variées nous donnent une position privilégiée pour mieux comprendre et répondre aux besoins et demandes de nos clients ainsi qu'aux attentes de nos fournisseurs.

Notre laboratoire de service à la clientèle et de R&D a confirmé et a donné une nouvelle dimension ainsi qu'une profondeur d'expertise technique et d'innovation à l'avant-garde de la technologie qui était déjà reconnue à Inortech.

L'équipe d'Inortech travaille sans relâche pour améliorer son service à la clientèle et augmenter la visibilité de nos fournisseurs dans les marchés que nous desservons : revêtements, encres, adhésifs et plastiques.

Ensemble nous irons... **AU-DELÀ**

Where's It At?

Welcome to the Canadian Finishing and Coatings Manufacturing annual Buyers Guide. This is the most updated and most recent guide available in Canada for the paint and coating and finishing industries. This guide is colour coded for your convenience. It begins with an alphabetical company listing, offering names addresses and contact information as well as a company description. Then each company is listed under various lists of products and services, which will help guide you to the right contact. Categories include:

- Industrial Finishes
- Industrial Finishing Equipment
- Paint & Coating Raw Materials
- Paint & Coating Manufacturing Equipment
- Custom Coaters and Job Shops
- Associations, Education, & Government

Under these lists, find the product you want, then the company you want, then go to the alphabetical company listings in order to contact them.

Every effort was made to contact manufacturers, suppliers, distributors, associations etc., to allow them an opportunity to submit a listing. We sent mail, e-mail

and telephone calls, postings on our web site, as well as a notice in our April issue. If we missed you in this print version of the Buyers you may still submit your online and be included in online version all year. Please www.cfcmmercuryemail.com and add your listing, which will online once it is approved by may make changes to your listing as many times as you wish throughout the year, but every change must wait for approval. From the Buyers Guide website, you may also download a pdf, fill it out and fax it to us if you wish.

Our print version is based on the information that appears in our online version.

There is always next year.

We hope you find this guide helpful and informative. If you have any questions or concerns please don't hesitate to contact us.

CALENDAR OF EVENTS

2009

September 13–15: Southern Metal Finishing Conference, Charleston, SC.

WMS Wood Finishing Workshop Targets Cost Savings

How to achieve a quality wood finish, increase productivity and save money is the theme of a half-day workshop scheduled for 8:30 a.m. to 12:30 p.m., Friday, September 25.

The program will be held at the International Centre, on the second day of the Woodworking Machinery & Supply Expo. It is being organized by the Centre for Advanced Wood Processing at the University of British Columbia.

Topics include:

- Reducing finishing costs in small shops
- Eliminating moisture control problems in finishing
- Increasing efficiencies through upgrading and optimizing finishing equipment
- Going lean in the finishing room

Plus, free admission to IDEX NeoCon (Sept. 24-25) with your WMS badge.

Alternate web sites: www.aomspray.com www.noveo.ca

Accuspray HVLP spray equipment, pneumatic and turbines; AOM HVLP and Hybrid guns for waterborne and solvent paints, airless and Air-assist, pneumatic and electric; Noveo Energy Saving Automatic Variable Exhaust Systems for spray booths; Airmax Fittings, pneumatic, hydraulic.

ACE Equipment Company

4725 Manufacturing Road,
Cleveland, OH 44149
P 216-267-6366 F 216-267-6366

sheran@armaturecoil.com

www.armaturecoil.com

Family owned since 1919, ACE Equipment manufac-

tures Burn Off and Curing Ovens. The unique design provides high efficiency, uniform temperatures and long life.

Aceto Corporation

1 Hollow Lane, Lake Success, NY 11042
P 516-627-6000 F 516-627-6093

rgoodman@aceto.com

www.aceto.com

Contact: Roy Goodman

Group Vice President

Aceto Corporation offers a wide range of chemicals for specific use in epoxy, urethane, UV-cured, powder, and polyurea coatings. These include a number of performance additives and a complete line of organic pigments and free-radical and cationic photoinitiators.

ACT Test Panel Technologies

273 Industrial Dr, Hillsdale, MI 49242
P 517-439-1485 F 517-439-1652

brad.kimpell@acttestpanels.com

www.acttestpanels.com

A wide range of products including ACT Certified Test Panels for coatings R&D; utility grade TRU panels for spray outs and hiding evaluations; appearance panels including color, orange peel, and powder smoothness standards; and corrosion supplies for laboratories.

Adroit Automation, Inc.

6262 N. Swan Road, Tucson, AZ 85718
P 520-884-8868 F 520-884-8887

jon@adroitblue.com

www.adroitblue.com

Contact: Jon Aries President

Adroit produces turnkey automated process lines. All systems are designed and commissioned in-house; including controls, hoists, tanks, ventilation and VWT. Adroit's software package WinHoist™ optimizes random loading, integrates all process equipment and provides full data documentation "quality compliance in-a-box."

Adwest Technologies, Inc.

1175 North Van Horne Way,
Anaheim, CA 92806
P 714-632-9801 F 714-632-9812

RT0info@adwestusa.com

www.adwestusa.com

Contact: Richard Whitford VP Operations

Adwest has installed over 800 RETOX Dual Chamber Regenerative Thermal Oxidizers for 99% VOC Control for finishing, spray booth, surface coating, chemical and curing oven applications. RETOX RTOs with Natural Gas Injection (NGI) provide Flameless NOx-Free operation with 95% Primary heat recovery for low energy consumption.

AGC Chemicals Americas

55 Uwchlan Ave., Exton, PA 19341
P 805-583-5917 F 805-583-5917

wdarden@agcchem.com

www.lumiflonusa.com

LUMIFLON fluoropolymer resins are used to make ultra-weatherable coatings for architectural, industrial maintenance, aerospace, and automotive applications. Products include solvent based resins, solid resins for low VOC coatings, water based resins, and powder coating resins.

AGI Corp. USA

Contact: Dawn Revette Marketing Manager
NYCO produces a line of wollastonite additives for all types of coatings. The mineral's acicular structure, low water solubility and basic pH give improved film cohesion and mechanical properties, reduce cracking and prevents downward pH drift for improved paint stability. Treated WOLLASTOCOAT grades act as auxiliary pigments in replacing up to 50% inhibitive pigments with-

out sacrificing corrosion/blister resistance at significant cost savings.

Bonderite®

Naturally Innovative

**BONDERITE® NT-1™,
NCG AND TECTALIS™**

Bonderite® NT-1™, NCG and TECTALIS™

THE NEW COATINGS STANDARD

Henkel knows that reducing manufacturing costs and improving quality and productivity, while helping businesses become environmentally sustainable, begins with innovation. Bonderite® NT-1™ and NCG (New Generation Coating), Henkel's groundbreaking nanoceramic paint pretreatment systems, set new industry standards that streamline the conventional coating process, reduce costs and protect the environment.

CAPABILITIES

Bonderite® surface pretreatments for conventional powder and wet paint coatings can be applied by immersion or spray applications, creating a cohesive, inorganic, high-density layer. Specifically formulated for use on steel, zinc and aluminum surfaces, Bonderite® NT-1™ and NCG pretreatments provide an ultra-thin coating, replacing iron and zinc phosphate, thereby reducing environmental impact and increasing corrosion resistance on painted metal surfaces.

**INNOVATIVE
SOLUTIONS**

TECTALIS™

Bondrite™ Tectalis™ the automotive industry's first phosphate-free conversion coating. This new paint pretreatment option not only uses less energy, making it better for the environment, but lowers manufacturing costs and improves productivity by eliminating steps in the pretreatment process.

Exactly your chemistry.

G-Shield™ Coatings

Graffiti and dirt protection in one coat

Clariant has developed an easy-to-use, easy-to-clean, clear solution against aggressive and damaging graffiti and unsightly dirt.

G-Shield™ is an innovative, durable coating which provides protection from graffiti and grime. Markers, paints, inks, tar, sap, grease, dirt and other stains cannot permanently adhere to the G-Shield™ protected

surfaces. Additionally, G-Shield™ will not alter the normal appearance of the substrate and is resistant to commercial cleaning solutions, and aggressive brake fluids. The protected material can be cleaned numerous times without reapplication or damage to G-Shield™.

G-Shield™ can be easily applied and because it is a

thin coating, G-Shield™ is very economical – especially for large surfaces.

In addition to protection from graffiti and grime, G-Shield™ provides effective protection from UV radiation and weathering. Compared with unprotected surfaces, the G-Shield™ protected surface displayed no tarnishing, gloss reduction, scratching, or paint damage.

A Revolutionary Chloride Zinc Electroplating Process Surpasses all Current Chloride Zinc Technologies.

Dynaplate CLZ is the newest generation, extremely bright and ductile chloride zinc system for rack and barrel plating. It is designed for use in non-ammonium, ammonium or mixed chloride zinc plating baths and the additives are water-soluble, which promotes better rinsing, eliminates oiling out, and improves iron removal.

Over 100 Acid Zinc production lines are benefiting from the advantages of Dynaplate CLZ!

- Unmatched Plate Distribution – Drastically reducing zinc-plating cost.
- No Cloud Point – Reducing/Eliminating cooling cost.
- Low Additive Consumption – Reducing operating cost.
- Unrivalled High Current Density Wetting – Substantial increase in productivity.
- Low Organic Content – Low stress and ductile deposit.

LOWEST OPERATING COST

ELECTRO-STEAM GENERATOR

MONEY \$\$\$ stays in your pocket preparing metal surfaces when using an Electro-Steam Generator Cleaner. Creates a total Phosphatizing and Cleaning System for preparing metal surfaces for Powder Coating or Painting.

ADVANTAGES:

- ◆ 50-75% less chemicals used
- ◆ 50-75% less water used
- ◆ 50-75% less contained Effluent
- ◆ Exact continuous chemical mixing
- ◆ Meets several Mil Specs.
- ◆ Dries Quickly

SAFETY FIRST:

- ◆ No Dangerous Flames
- ◆ No Noxious Fumes
- ◆ No Combustible Fuel
- ◆ No Fuel Storage

MADE IN THE USA

ELECTRO-STEAM GENERATOR CORPORATION

DO THESE GUNS LOOK GREEN TO YOU?

VECTOR | **VECTOR solo** | **NO. 2**
PROCESS GUN

A FULL LINE OF CORDED AND CORDLESS GUNS FOR EVERY APPLICATION

Though they may not look green, Ransburg Vector, Vector Solo and No. 2 Gun not only deliver high quality finishes but also help protect the environment.

These guns offer superior transfer efficiency and color versatility while improving productivity and reducing waste. Our Ransburg Electrostatic Equipment helps end users achieve environmental responsibility as well as enhanced finish quality.

Ransburg Electrostatics...

- Reduce Overspray
- Reduce VOC's
- Reduce Cleanup
- Reduce Sludge

To find out more about how ITW Ransburg Electrostatic Guns can benefit your operation – and the environment – contact your authorized Ransburg distributor today! Tell them you want to check out some green guns. Visit our website www.itwransburg.com or call 1-800-223-3366.

UDYLITE power conversion equipment from process Electronics Corporation exemplifies engineered quality. For 55 years, PEC has been meeting demanding requirements worldwide with standard and custom designs. From closed-loop, liquid-cooled power centers to portable bench converters, UDYLITE is the metal finishing industry's choice for dependability and efficient power.

Can-Am's Turbine- powered Liquid Spray

application system is unique. Its variety of spray guns works very well at pressure ranges of 0.5–8.75psi and cfm outputs of 9–28. These spray guns are used in many industries utilizing liquid spray application.

Together...making waves in the pond

Andicor Specialty Chemicals is a full-service national distributor of specialty chemicals and packaging. Our mission is to be a seamless extension of the suppliers we represent, offering:

- competitively-priced value-added products from some of the world's leading producers
- superior customer service
- knowledgeable and responsive sales staff
- local warehousing and delivery services

Chemroy It's Easy Being Green!

LOW VOC Solutions- Ready to Launch.

The LOW VOC products you NEED:

- Biocides • Coalescent Agents • Dispersants and Surfactants
- Pigments and Dispersions • Rheology Modifiers
- Waterborne Resins and Crosslinkers • High Solid Resins

From the Manufacturers you Trust:

- Cognis
- Clariant
- CVC/Emerald
- Dow
- Elementis
- Eliokem
- Hoover
- Huntsman
- Lubrizol
- PPG

THE CONN BLADE®

Patented blending/dispersing blade design makes radical improvement over old saw tooth designs

- * Most efficient and aggressive blending/dispersing blade available.
- * Provides proper combination of pumping action and shear/dispersion essential for fast consistent results.
- * Built in pumping action cuts processing time.
- * Longer life due to heavier gauge construction.
- * Less heat due to shorter required running time.
- * Excellent for high or low speed and high or low viscosity.
- * Supplied with hubs or mounting holes required to retrofit and upgrade present equipment.
- * Pumping blades without teeth are available and are excellent for gentle blending and agitation.

DIVISION OF CLEMMER STEELCRAFT TECHNOLOGIES

Increase your company's profitability, enhance its image, and improve product quality, reliability and delivery by using Bower's seventy years of experience in supplying custom designed process equipment. If you need equipment for mixing, high speed dispersing, blending, ram discharging or just a replacement rotor blade, call us. The others do.

Complete Inventory of Replacement Rotor Blades for any type of equipment

*It's time...
to go green!*

- Specially Designed Blade allows for high efficiency grinding or dispersion which saves you time and energy
- Using QuickBlades decreases the need to use a mill
- We offer Laboratory & Production blades with several designs to choose from
- Same day shipping most cases

Next Generation of Coating Solutions

Henkel's Bonderite® NT-1™ and NGC

- Bonderite® NT-1™ and NGC surface pretreatments are conventional powder and wet paint coatings, that can be applied by immersion or spray applications
- Provides an ultra-thin coating, replacing iron and zinc phosphate, thereby reducing environmental impact and increasing corrosion resistance on painted metal surfaces
- Specifically formulated for use on steel, zinc and aluminum surfaces

Aquence™ 925G™ & 930™, TecTalis™, Bonderite® NT-1™ and NGC Coatings

Henkel's Aquence™ 925G™

- Next generation coating provides all the performance advantages of autodeposited epoxy-acrylic urethane coatings
- A lighter color base for top coating with powder and liquid paints
- Applications include any ferrous metal part or structure requiring superior cyclic corrosion protection, thermal stability and good topcoat ability, lower paint consumption

Henkel's Aquence™ 930™

- For vehicle frames and chassis components
- Has achieved 1000 hours of performance on Neutral Salt Spray (NSS) testing
- Performs similar to zinc phosphate pretreatment and traditional coatings on automotive OEM cyclic corrosion tests
- Epoxy-acrylic urethane coating has excellent thermal stability, topcoat ability and flexibility. www.aquence930.com

INNOVATIVE SOLUTIONS

Henkel's Bonderite® TecTalis™

Henkel developed TecTalis™, the automotive industry's first phosphate-free conversion coating. This new paint pretreatment option not only uses less energy, making it better for the environment, but lowers manufacturing costs and improves productivity by eliminating steps in the pretreatment process.

- Operates at ambient temperatures
- Contains no regulated heavy metals
- Phosphate-free with no BODs or CODs
- Reduces operating costs
